have an effect on her like no other guy

[Power](#)

If Level 1 does the job completely, keep re-reading your notes and doing

If Level 1 does not completely get you there + you need a little extra help, send me a quick email explaining the situation and I'll tell you what you need to focus on.

If you're in a 'scenario' not mentioned above, you can either (Option #1) send an email explaining the situation ⇒ and then [order a Custom Email Strategy Report](#)

Option #2: Send an email explaining your situation ⇒ And have me recommend which report/reports you should get.

Also - in terms of other important notes - any strategy that you use/develop will be magnified in terms of success rate based on having the right mind set - whether the strategy/gameplan is based on (1) an idea that you came up with based on something that you think could work or (2) whether you create the strategy as a result of reading any of the reports in The Super Store.

Keep that in mind. Mindset is very important (as you may already know)

- Do things that get you in a positive mindset.
- Do things that get you to feel like you're *the man*.
- Have a mindset as though you expect things to go your way.

When you're in that sort of mindset, you'll **get more out of your strategy**.

If you have any quick questions about anything, I would love to help.
